

Glutheim Consortium

Fantasy RPG Guide – Extended Edition

When the runes awaken, no path is merely a path. Every step through Glutheim is a trade with light, steel, and memory.

Foreword

This manual describes the fantasy variant of the RPG **Glutheim Consortium** in its expanded edition. It is written in the style of classic computer game manuals: as a companion for players who want to know not only which button to press but also understand what happens in the world.

The fantasy version uses the catalog:

```
fantasy_rpg_catalog
```

At the start of the game, you choose:

```
(2) fantasy_rpg_catalog
```

After that, your journey begins through Glutheim, Eldoran, and the crumbling Runic Paths.

1. Welcome to Glutheim

You are an operator of the **Glutheim Consortium**, an ancient alliance of guardians, runemakers, chronicles, border guards, and aether scholars. Your task is to explore the unstable regions of Eldoran, defeat enemies, secure resources, decode chronicles, and halt the expanding worldmap's expansion.

Glutheim isn't just any kingdom—it's a living network of:

- Temples
- Crystal Deserts
- Mist Zones
- Forts
- Bastion
- Cracks of the World
- forgotten Chronicle Orbs

Every choice alters something: your values, relationships, gear, chronicle, or world stability.

2. The Goal of the Game

In Glutheim there is not only a single goal. Your adventure unfolds through many interconnected tasks:

- Defeat an opponent.
- Gain experience
- to ascend
- Earn Gold Coins
- Explore Regions
- Resources gathered
- Craft Artifacts
- Find Relics
- Unlock Skills
- Influence Factions
- Interpret Omens
- Survive Expeditions
- Fill the Bestiary
- Achieve title
- to observe the world map
- write the living chronicle

You can play briefly and save. Or you can start a long session, embark on expeditions, and try to turn a simple operator into an Eldoran Legendary.

3. The Aether Menu

The main menu appears after starting the game:

```
--- AETHER-MENÜ ---  
(1) Orakelblick  
(2) Portal zu Regionen  
(3) Gildenmarkt  
(4) Chronik & Quests  
(5) Ranglisten der Eldoran  
(6) Hüter-Archiv  
(7) Welten-Runen  
(8) Chroniken  
(9) Runentasche  
(10) Arkanmarkt  
(11) Runenschmiede  
(12) Sternenpfade  
(13) Lagerfeuer  
(14) Expeditionen  
(15) Bestiarium  
(16) Titelhalle  
(17) Lebende Chronik  
(18) Reliktkammer  
(19) Omenbinder  
(20) Runenrätsel
```

Each menu item opens its own system. The first points form the base game, while later points expand Glutheim into a larger fantasy roguelike adventure.

4. Oracle View – Battle and Exploration

Oracle View: Combat and Exploration

The Oracle View is your most important action for direct encounters. You scan the current region, find enemies, fight them, and receive rewards.

Possible encounters during the Oracle View include:

- Regular enemies
- Enemy with behavior type
- Boss enemy
- Stability alerts
- Physics anomalies
- Omen Effects
- Resource Finds
- Faction Changes
- Chronicle Entries
- Nemesis Events

Example Notification:

Rotierender Windwirbel, der deine Haltung prüft. (Regenerator)

Enemies can now have more than just HP values. Some possess behaviors like regeneration, shield, rage, or special reactions.

5. The Combat System

In the expanded fantasy game, there are more combat options than before:

AKTION:

- (1) Schlag
- (2) Runenstoß (Schwer)
- (3) Heilung (Licht)
- (4) Konter-Rune
- (5) Relikt
- (6) Analyse
- (7) Rückzug

5.1 Attack

The standard attack. Reliable, simple, and usually safe.

```
Operator -> Gegner: 25 Schaden übertragen.
```

5.2 Runeblast

A heavy attack with higher risk. It's ideal for quickly ending an opponent, but can be disadvantageous if the opponent has strong defensive capabilities.

5.3 Healing

Uses available healing items or light energy to restore health points.

5.4 Counter Rune

A tactical reaction. It's particularly useful when you expect the opponent to strike next. Against aggressive opponents, it can be valuable.

5.5 Enable Relic

If you possess or equip a relic, you can activate its power in battle. Relics are powerful but often dangerous.

5.6 Analyze

Analyze the enemy. This action is useful if you want to better understand their Bestiary, behavior, or potential weaknesses.

5.7 Withdrawal

Withdrawal does not always end the battle gloriously but can save your life. In expeditions, withdrawal is particularly risky because you may lose progress.

6. Enemy Behavior

Some enemies have behavior types. These alter the course of the battle.

Regenerator

Heals after certain rounds.

```
[GEGNER] Regeneration: Der Feind schließt seine Wunden.
```

Berserker

Becomes more dangerous when health points drop.

Shield Bearer

Filters or blocks certain results.

Fate Seeker

Can your values weaken or hinder healing.

Bandit

Can gold or resources be dangerous?

Splitter Monster

Can trigger further effects after death.

These enemies force you to consciously choose your combat action. A runic strike isn't always the best response.

7. Boss Phases

Bosses now have phases. This means: A boss changes its behavior when it takes damage.

Example:

```
[PHASE] Der Prismatische Souverän zerbricht seine erste Maske!
```

Possible phases:

- Shield phase
- Razor phase
- Reflection phase
- Decay phase
- Final Form

Boss battles should thus have a more dramatic effect. You fight not only against a large life bar but also against a creature that evolves throughout the encounter.

Experience, Level and Progression

Through battles, you gain experience points. After accumulating enough experience, you level up.

```
*** Ritus! Operator erreicht Rang 2 (ATK: 20) ***
```

A rank upgrade can make you stronger and unlock new regions, enemies, or systems. Higher levels are particularly important for expeditions, boss encounters, and dangerous omens.

7. Portal to Regions

Menu Item 2: Portal to Regions

Here, you switch between known regions.

Examples:

```
Glutheim-Tempel [Verdant]
Kristall-Wüste [Arid]
Zone Sylvan [Verdant]
Zone Bastion [Arid]
Zone Maelstrom [Ember]
```

New regions can emerge or unlock during gameplay. Some are influenced by your rank, chronicles, or world states.

10. Living Regions

Regions are no longer just locations; they have states.

Possible Properties:

- Stability
- Threat
- active omen
- Resource Wealth
- Faction Influence

An unstable region can bring forth more dangerous enemies. A blessed region can enable better finds. A world event can tip a region.

Examples:

```
Glutheim-Tempel
Stabilität: 73%
Bedrohung: Mittel
Einfluss: Verdant-Konsortium
```

8. Eldoran Regions

Glutheim Temple

The first major settlement of your journey. An ancient hub of Verdant Magic. Here you learn combat, resources, and chronicles.

Crystal Desert

A southern desert area made of shards, dust, and light paths. Harsher, restless, and rich in crystal resources.

Sylvan Zone

Fog, glowing treetops, and ancient nature magic. Good for resources and exploration.

Bastion Zone

Ruined halls and arcane emissions. A dangerous place for experienced players.

Maelstrom Zone

A storm chamber with arcan weather. Instable, risky, and ideal for players seeking strong rewards.

9. Guild Market

Menu Item 3: Guild Market

The Guild Market is your classic merchant area.

You can:

- Buy Healing Potion
- Improve attack skills

- Acquire Trait-Runes
- Buy scrolls
- Discover faction offers

Common options:

- (1) Heiltrank [150 G]
- (2) Waffenschmied +5 ATK [500 G]
- (3) Trait-Runenstein [250 G]
- (4) Verborgene Schriftrulle [400 G]

The Gildenmarkt is good for direct character improvement.

10. Chronicle & Quests

Menu Item 4: Chronicle & Quests

Here you see your current status:

- Level
- Life Points
- Gold
- Quest progress
- Achievements
- Faction values
- Equipment
- Skills
- Active Titles or Effects

The standard quest challenges you to defeat enemies.

Kopfgeld: Vernichte 3 / 5 Virus-Drohnen.

In fantasy interpretations, such enemies are magical constructs, runic beings, shadow machines, or ancient guardians.

Eldoran rankings (11th place)

Section 5: Eldoran Rankings

Ranking 14. Eldoran

- top level
- most victories
- strongest relics
- best expeditions
- highest faction values
- rarest title

15. Hüters Archive

Menu Item 6: Guardian Archive

Saves the game progress and ends the session.

```
[SYSTEM] Sigillen-Chronik wurde gesichert.
```

The fantasy variant uses its own save files so that other worlds are not overwritten.

13. World Runestones

World Runestones: Menu Item 7

Here you control major world events.

Shadow of Fall

The world groans under new gravitational forces. Enemies and regions can become more dangerous.

Aurora Pulse

The Aether currents stabilize. Some effects may have a stabilizing impact.

World events change not only a battle but also the mood and rules of the entire session.

14. Chronicles

Section 8: Chronicles

The Chronicles are the narrative layer of the game. Here, fragments of past missions and decisions appear.

Examples:

```
CHRONIK [intro]: Ein Fragmentrooster flackert auf. Der Operato
```

Decisions can have consequences: Factions, resources, stability, or future events may be influenced.

15. Backpack

Menu Item 9: Backpack

Menu Item 9: Backpack: The backpack is your inventory. Here you see:

- Weapons
- Artifacts
- Resources
- Equipped Items
- collected loot

Equipment can change values:

- Attack
- Defense

- Defense Chance
- Life Points
- Stability Costs
- Resource Bonuses

16. Arkham Market

Menu Item 10: Arkana Marketplace

The Arkan Market is an expanded trading platform.

You can:

- Buy Items
- Sell Resources
- Purchase Equipment
- Gain gold through material trading

Some offers may change due to world conditions or special merchants

17. Runewriter

Menu Item 11: Runic Forge

You create equipment in the runic smithy.

You need:

- Resources
- Gold
- sometimes existing items

Examples:

Drachenschmiede-Essenz
Sylvan-Aegis-Bootstrapping
Phönixmantel weben
Sternensplitter-Lanze schmieden
Dämmerungs-Aegis binden

Crafting is the path to long-term strength. Fighters win battles. Smiths win wars.

18. Star Paths

Menu Item 12: Star Paths

The Star Paths are your skill system.

Examples:

Runic Knowledge

Increases resource yield.

Enhanced runic knowledge. Increases further resource yield.

Improved runic knowledge.

A protective or special active ability that provides shield but costs stability.

A protective skill with a possible stability cost.

Skills change your strategy and make your character more unique.

22. Campfire

Menu Item 13: Campfire

Campfire is a rest stop. Here you can relax, but relaxation has its price.

Possible stopping options:

- short rest
- deep rest
- night watch

A rest can restore health points but also let time pass, change omens, or increase dangers.

Use the campfire before expeditions or after heavy battles.

23. Expeditions

Menu Item 14: Expeditions

Expeditions are small adventure chains. They consist of multiple chambers.

Typical structure:

```
Kammer 1: Kampf  
Kammer 2: Ereignis oder Rätsel  
Kammer 3: Boss oder Schatz
```

Examples:

- ```
(1) Mondkatakomben betreten
(2) Kristallgruft betreten
```

Expeditions are riskier than regular battles but more rewarding. They suit players who seek a real adventure.

During an expedition, the following can occur:

- Enemies with behavior patterns
- Puzzles
- Resource Finds
- Boss Phases
- Relic Finds
- Chronicle Entries
- Faction Changes

## 24. Bestiary

Menu Item 15: Bestiary

The Bestiary collects information about defeated enemies.

Possible Entries:

```
Rotierender Windwirbel
Besiegt: 3
Verhalten: Regenerator
Notiz: Schließt seine Wunden nach mehreren Runden.
```

The Bestiary rewards players for battling and analyzing many types of enemies. It serves as a collection, memory, and tactical reference tool.

## 25th Title Hall

**Menu Item 16: Title Hall**

Title titles are special awards. Some may have effects.

Examples:

AWAKENING  
RUNENMEISTER  
LUMINA-ARCHON  
Omenbinder  
Sternenschmied

A title is more than just a name. It shows what your character has experienced. In later game states, it can also unlock bonuses or recognition.

## 26. Living Chronicle

### Menu Item 17: Living Chronicle

The Living Chronicle is your personal adventure book. It records important events.

Example:

Operator besiegte den Rotierenden Windwirbel im Glutheim-Tempel.  
Unter dem Schattenfall sank die Stabilität der Region.  
In den Mondkatakomben wurde ein Relikt gefunden.

Each run feels personalized. The chronicle isn't just a list of numbers—it's your story.

## 27. Relict Chamber

### Menu Item 18: Relict Chamber

Relics are powerful artifacts with risks.

Examples:

### Crown of the Seven Flames

Gives great power but can influence the map structure.

## **Mirror of the First Moon, can reflect damage or trigger special effects.**

Can reflect damage or trigger special effects.

## **Can save you but demands a price.**

Relics should not be used blindly. They are tools for desperate or brave players.

28th Omen Binder

# **28. Omenbinder**

### **Menu Item 19: Omenbinder**

Omens are time-limited world signs. They alter combat, resources, healing, or stability.

Examples:

Dornenmond  
Kristallregen  
Blutstern  
Flüsternebel  
Phönix-Aschefall  
Schattenkonjunktion  
Aurora-Segen

An omen can be helpful or dangerous. The Omenbinder lets you view or influence these signs.

Difference between Omen and World Event:

Welt-Event = großes, bewusstes Ereignis  
Omen = dynamisches Zeichen mit begrenzter Dauer

## 29. Riddle of the Runic Stones

### Rune Puzzle

Rune puzzles are text-based tests. They require attention, memory, or intuition.

Example:

```
Drei Runen leuchten: Feuer, Mond, Schatten.
Eine Inschrift sagt:
"Was brennt, darf nicht zuerst fallen."
```

Wähle Reihenfolge:

- (1) Feuer → Mond → Schatten
- (2) Mond → Feuer → Schatten
- (3) Schatten → Feuer → Mond

Success can bring:

- Gold
- Resources
- Stability
- Chronicle Progress
- rare rewards

errors can bring:

- enemies
- curses
- Loss of stability
- lost opportunity

## 30. Resources

Resources are materials for trading and blacksmithing.

## **Glutstein-Splitter**

A burning splinter with its own resonance.

## **Moon Crystal Scale**

Reflects misty light and aetheric rays.

## **Aurora tear**

Healing liquid essence of light

## **Phoenix ash**

A rare remnant from rebirth fires.

## **Stellar salt**

Crystallized light from stellar paths

## **Twilight glass**

A dark, shimmering material for protective artifacts.

# **20. Gear and Artifacts**

Gear directly affects your character's traits.

## **Runestone**

An early weapon with an attack bonus and light critical chance.

## **Aether Shield**

Defensive artifact with stability costs.

## Star Cloak

Increases Life Energy and Critical Effect.

## Dragon Forge Iron

Forged material or combat item.

## Silber-Armor

A powerful protective item with offensive and defensive traits.

## Phoenix Armor

An artifact for survivalists.

## Star-Shard Lance

A high-damage offensive weapon.

## Evening's Aegis

A protective artifact for dangerous encounters.

## 32. Runic synergies.

Some equipment can create special synergies together.

Example:

```
Runenklinge + Sternenmantel
= Sternenpakt
```

Synergies give you a reason to test various piece combinations; the strongest single item isn't always the best combination.

## 33. Class Paths

Your character can evolve through behavior.

Possible Paths:

### **Rune Berserker**

Created through aggressive combat tactics and frequent heavy attacks.

### **Lightkeeper**

Arises from healing, protection, and defensive decisions.

### **Craftsman of the Stars**

Arises through resources, crafting, and equipment.

### **Omen Binder**

Created through interaction with omens and world events.

### **Emissary**

Created through faction work and decisions.

The class is not necessarily chosen at the start. It emerges from your gameplay.

## 35. World Stability and the Shattering of Worlds

In Glutheim, factions change in reputation.

## Verdant Consortium

Guardians of the Knots and Keepers of Stability. They represent order, growth, and protection.

## Guardians of the Knots and Keepers of Stability

Lightweavers who create order through pulse vibrations. They embody light, rhythm, and control.

Faction values influence offers, chronicle sequences, and rewards.

# The world maintains stability but also poses a dangerous counterbalance: the World Shatter

The world possesses stability but also a dangerous counterpart: the **World Rift**.

## Stability

Shows how orderly a region or the world is.

## World Rift

Shows how far Eldoran is breaking apart.

Examples of Influence:

```

Boss besiegt: Weltenriss sinkt
Schattenfall aktiv: Weltenriss steigt
Relikt missbraucht: Weltenriss steigt
Rätsel gelöst: Stabilität steigt

```

The higher the World Shattering, the more dangerous Glutheim can become.

## 23. Traits and Scrolls

At the Guild Market, you can purchase special upgrades.

### Trait-Rune of the Mark

Activates a special trait. Traits can be powerful but may sometimes bring disadvantages.

### Hidden Scroll

Releases Knowledge. Knowledge can influence dialogues, factions, effects, or future content.

## 37. Wander Merchant

Sometimes a special vendor appears. Their offer may differ from regular markets.

Possible Items:

- rare resources
- Rare Resources
- special Equipment
- dangerous artifacts
- expensive remedies

The Nomad Trader is an opportunity. Ignoring him might mean he's gone later.

## 38. Nemesis System

If a rival severely injures you, defeats you, or escapes, they can become a Nemesis.

A Nemesis returns stronger.

Example:

```
[NEMESIS] Der Schattenspeer-Hüter merkt sich deinen Namen.
```

Later:

```
[NEMESIS] Der Schattenspeer-Hüter kehrt zurück!
```

Defeating a Nemesis can provide special rewards and feels like a personal victory.

## 39. Blessings and Curses

Omens, Relics, Riddles, and Chronicles can bestow blessings or curses.

### Blessing

- More crit chance
- better resources
- faster healing
- Stability gain

### Curses

- Damage Over Time
- Weaker Healing
- Stronger Enemies
- Instability Loss

Not every advantage is free. Not every disadvantage is permanent.

## 26. Example of a game session

An example session could look like this:

- Choose the Fantasy Catalog.
- Aether menu appears.
- Check Omenbinder.
- Use Oracle View.
- Defeat enemies with behavior.
- Obtain Gold and Experience Points.
- Bestiary grows.
- Review chronicle & quests.
- Open the backpack.
- Visit Arkan Marketplace.
- Sell resources.
- Use Runic Forge.
- Improve star paths.
- Visit campfire.
- Start expedition.
- Solve puzzle.
- Boss fight with phases.
- Find a Relic.
- Read the Living Chronicle.
- Save in the Guardian Archive.

## 41. Survival Tips

Save regularly via the **Guardian Archive**.

Start expeditions with high health points.

Use the **campfire** before entering dangerous areas.

If an enemy has regeneration, defeat them quickly.

Analyze unknown opponents.

Collect resources even if you don't need them immediately.

Do not sell rare materials too early.

Test equipment combinations for potential synergies.

Relics are powerful but risky.

Observe the map of the world.

## 25. Advanced Strategy

A strong hero is built on four pillars:

Kampf + Ausrüstung + Skills + Fraktionen + Chronik + Weltzustand

Fighting earns experience. Equipment provides direct strength. Skills change your strategy. Factions open opportunities. Chronicles shape history. World state alters risks and chances.

Those who fight alone survive. Those who combine systems become legendary.

## 27. Frequently Asked Questions

### Why do I sometimes see technical terms?

The game is based on a token and catalog system. If a token like `[[000WB1]]` appears, there's missing text in the active catalog.

### Why do some enemies have names like drones?

The engine blends technical and fantasy enemy lists. In fantasy games, they are interpreted as magical constructs, runic machines, or guardians.

## **Why is there gold and credits?**

Technically, the engine uses Credits. The fantasy catalog interprets them as gold coins.

## **Can I play in multiple worlds separately?**

Yes. The fantasy variant uses its own save states, ensuring other catalog worlds aren't overwritten.

## **Why is a Relic dangerous?**

Relics are intentionally risky. They grant power but make decisions harder.

## **Why should I play Expeditions?**

Expeditions combine combat, puzzles, boss fights, and rewards—more dangerous, thrilling, and rewarding than solo battles.

# **Glossary**

## **Aether**

Base Magic Energy of the Fantasy World. It connects Runic symbols, Regions, World Events, and Chronicles.

## **Aether Menu**

The main menu of the fantasy variant.

## **Analysis**

Battle action to examine an opponent.

## **Arcanum Market**

Extended Marketplace for Items and Resources.

## **Aurora Society**

Faction of Light Weavers and Pulse Mages.

## **An event affecting the entire world that calms the ether currents.**

Chronicles

## **Bestiary**

Collection of defeated and studied opponents.

## **Boss Phase**

State of a boss that changes during combat.

## **The storytelling system of the game. Narrative fragments and decisions appear here.**

Gameplay narrative and decision system of the game.

## **Duskglass**

Rare protective material.

## **Eldoran**

The larger fantasy world.

## **Expedition**

Multi-chamber adventure structure.

## **Faction**

A group with its own reputation.

## **Glutheim**

Central starting region of the fantasy variant.

## **Glutheim Consortium**

Player's organization.

## **Glutstein Shards**

Fire Resonance Resource.

## **Warden Archive**

Storage function.

## **Counter Rune**

Tactical combat counteraction against enemy attacks.

## **Campfire**

Rest system for relaxation and risk.

## **Living Chronicle**

Personal Adventure Log of Your Hero.

## **Life Force**

Fantasy term for life points.

## **Moon Catacombs**

Expedition area with chambers, enemies, and puzzles.

## **Light-reflecting crystal resource (Moon Crystal Scale)**

Crystal resource.

## **Nemesis**

Personal enemy who returns stronger.

## **Omen**

Time-limited global sign with effects.

## **Omen binder**

System for viewing or influencing omens.

## **Operator**

Player character.

## **Divination sight**

Action for combat and exploration.

## **Phoenix Egg**

Rare resource from rebirth fires.

## **Region Portal**

Travel system.

## **Regenerater**

Opponent behavior that allows healing.

## **Relict**

Powerful Artifact with Risk.

## **Relict Chamber**

Office for managing found relics.

## **Rune Puzzle**

Text-based quiz with reward or risk.

## **Rune Forge**

Crafting System

## **Rune Strike**

Heavy Attack

## **Rune Synergy**

Bonus from specific equipment combinations

## **Runestone pouch**

Inventory.

## **Shadowfall event**

Dangerous World Event.

## **Dangerous World Event**

Positive temporary effect.

## **Sector**

Technical term for region.

## **Sigil Chronicle**

Fantasy term for game state.

## **Stellar Paths**

Skill system.

## **Star Salt**

Starlight resource.

## **Award for outstanding achievements.**

Award for outstanding achievements

## **Title Hall**

Place to view titles

## **Trait**

Special trait or runic effect.

## Verdant Consortium

Faction of Stability and Knot Wardens.

## Traveler

Rare dealer with a special offer.

## Global Event

Major global event.

## World Map

Measure for the decay of Eldoran.

## World Stability

Measure for order and security of a region or the world.

## Last word

Glutheim is not a game about a single number. It's a game about decisions.

You can fight. You can forge. You can act. You can research. You can bind omens. You can risk relics. You can write chronicles.

Each session becomes a new chapter.

**Not every rune wants to be used. Some want to be guarded. Some want to test you.**
